

I would like to comment on your proposed rule making concerning the Indiana law that allows me to elect to not have individuals and firms telephone me to market various offerings. I strongly endorse and support the Indiana legislation. I pay for the telephone service and feel that should be able to ask unwelcome callers not to use my service and my time to solicit me. I feel particularly strongly about the paid callers who solicit gifts on behalf of what are presumably charitable organizations.

Please don't change the Indiana law. If anything, make it stronger and more inclusive.
